Claims 1-10, drawn to a method of positioning a guide channel, classified in class
 subclass 898.

Page 2

II. Claims 11-26, drawn to a system for positioning a guide channel, classified in class 606, subclass 1.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method could be used to position a tool.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Joseph Sofer on June 10, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
